**Social Ads Tool**  
is a web-based solution developed to help advertisers manage Facebook advertising campaigns more efficiently and effectively.

## WHY USE IT?

Social Ads Tool is aimed at advertisers and agencies that run large-scale advertising campaigns. Until now, advertisers have had to dedicate a lot of resources to managing multiple Facebook accounts in order to monitor, evaluate and control complex campaigns.

Through integration with the Facebook API (Application Programming Interface), the Social Ads Tool makes it possible to set-up, manage and optimise multiple Facebook campaigns through a single, intuitive, interface. The tool's report centre provides the whole range of campaign data in a clear, customizable format, leading to better-informed decision-making and increased ROI.

**Report Centre**

**SOCIAL AdsTOOL**

## FACEBOOK API

through robust back-end integration with the **Facebook APIs**, it is possible to manage campaigns and ads without the need to log in to Facebook's User Interface. All data is automatically synchronized with the Facebook databases.

## CAMPAIN MANAGEMENT CENTRE:

to sort, view and edit a single campaign or multiple campaigns. A range of filter settings can be applied and campaign data can be imported or exported in bulk. A scheduling function makes it possible to put a campaign live on specific days of the week and/or at a precise time of the day, maximizing control and performance.

## ADVERTISER MANAGEMENT CENTRE:

to manage advertiser information including contact details, Facebook account(s) and budgets. A user-friendly wizard lets users configure, test and deploy tracking scripts for real-time conversion tracking.
